MCP GLP AUDIT PROXY

Secure and compliant access to your laboratory data.

Give AI and external tools access to your data without compromising integrity, security or GLP compliance.

CONTROLLED ACCESS

Secure, read-only or configurable access to your laboratory data.

FULL AUDIT TRAIL

Track every request and response for transparency and compliance.

BUILT FOR REGULATED ENVIRONMENTS

Designed for GLP, GMP and other regulated laboratory contexts.

"Unlock the value of your laboratory data — safely and compliantly."

MCP GLP AUDIT PROXY

Connect AI and external tools to your laboratory data with confidence.

From your data
to new possibilities.
Without compromising compliance.

How it works

A secure bridge between external tools and your laboratory data.

1 Request
An AI tool or external application requests data through the proxy.

2 Validation
The proxy checks permissions, policies and compliance rules.

3 Controlled access
Approved data is retrieved in a controlled and auditable way.

4 Audit & monitoring
All actions are logged for full traceability and compliance.

Key benefits

More value from your data, without increasing risk.

Maintain compliance

Designed for GLP, GMP and regulated environments.

Enable collaboration

Work safely with AI tools, external partners and research collaborators.

Save time

Simplify and accelerate access to the right data.

Stay in control

Define what can be accessed and monitor every interaction.

Typical use cases

- AI-assisted analysis of laboratory data
- Secure data sharing with external partners
- Support for regulatory inspections and audits
- Integration with analytics and reporting tools
- Standardized access across multiple systems

Designed for laboratories, built for compliance

LIMS & ELN Integration | GLP / GMP Ready | Secure Architecture | Audit & Reporting | Flexible Deployment
